

## Weekend Planner

These mockups were really meant as a helper for me, therefore may not seem super readable. Especially the initial ones.

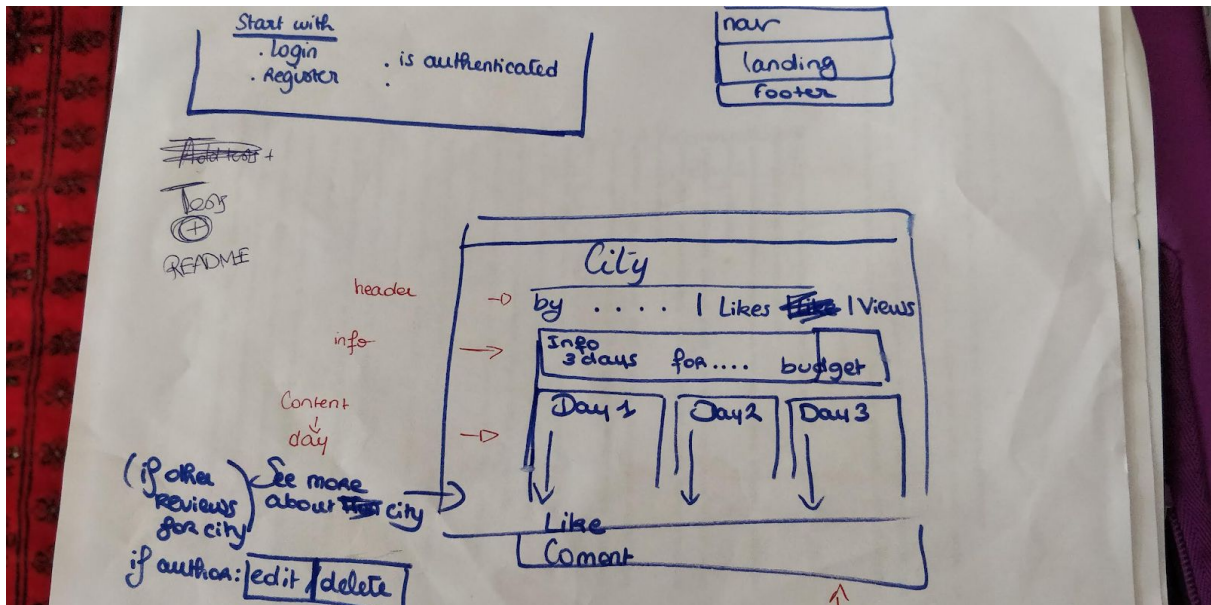

### 1. Initial database design.

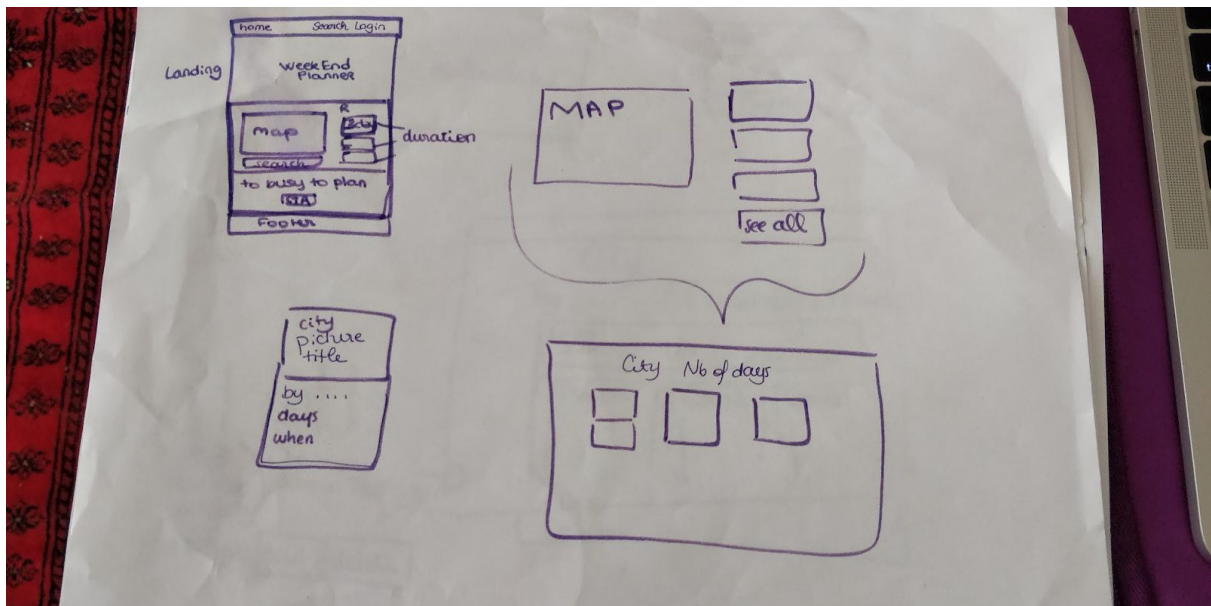

### 2. Initial brainstorming for the itinerary form

A hand-drawn mockup for the 'Add A Recommendation' form. The form is titled 'Add A Recommendation' and includes a 'General' section with a 'days' dropdown menu. Below this, there are input fields for 'city', 'language', 'country', 'currency', and 'budget'. The form is divided into three columns for 'Day 1', 'Day 2', and 'Day 3'. Below the form, there is a navigation bar with links: 'Apps', 'Accounts', 'Home', 'Recommendations', and 'Create a trip/Itinerary'. The 'Accounts' link is highlighted with a red arrow. The 'Recommendations' link is also highlighted with a red arrow. The 'Create a trip/Itinerary' link is highlighted with a red arrow. The form is part of a larger document titled 'DER MARGARETHENHOF GOLF & HOTEL AM TEGERNSEE'.

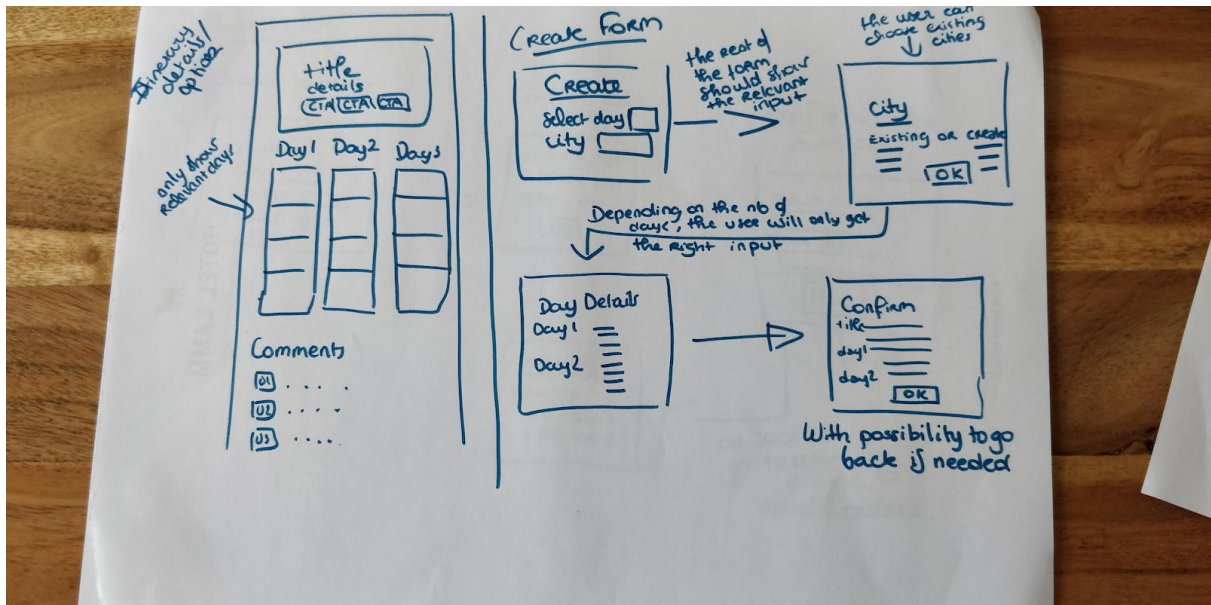

### 3. Preliminary mock up for the itinerary detail page.

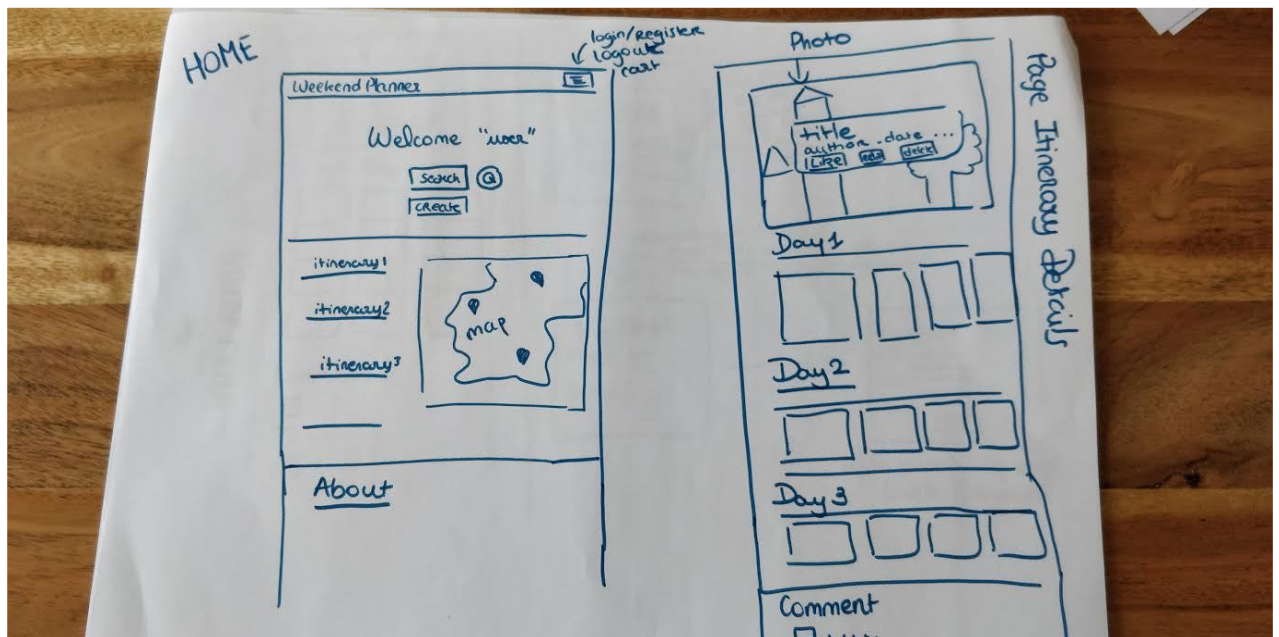

#### 4. Preliminary mock ups for the home page

#### 5. Advanced Mockup for the itinerary details page and creation form

## 6. Advanced Mockup for the home page and details page (prototype 2)

## 7. UX Design for the checkout process
